 [Mohit-Raj-Singh-Portfolio](#)

I'm a Full Stack Developer with a talent for problem-solving. I'm experienced in the entire development process and enjoy finding creative solutions. I work well in dynamic environments and am excited to contribute my skills to meaningful projects.

Experience

- Chaincode Consulting LLP (Full Stack Developer)

Jan 2024- Present

In the NFTtrace project, I worked on the Aashtha Special Train and Tejas Holi Special Train phases, contributing to frontend and backend development. I collaborated with team members to deliver high-quality solutions and meet project milestones. Additionally, I integrated Web3 technologies to enhance the project's blockchain capabilities.
- Chaincode Consulting LLP (Jr. Full Stack Developer)

Oct 2023-Jan 2024

I've developed the Nishania page UI, integrated the frontend for Wild Wheat Bakery, and contributed to both frontend and backend of NFTtrace. NFTtrace uses NFTs to revolutionize industries with tamper-proof, traceable digital records and authentic assets.
- WhatCode.in (Full Stack Trainee)

Sept-2022-Oct 2023-

I worked on the AceTech project, handling UI development and frontend integration. I designed functional user interfaces and ensured seamless user experience, collaborating with backend developers to deliver a polished product.

Skills

- React.js
 - Next.js
 - Express.js
 - MongoDB
 - HTML
- Nest.js
 - Node.js
 - MySql
 - JavaScript
 - TypScript
 - CSS

Education

- Masai School

2022

- Full Stack MERN Developer(Full Time Course)
- Dr APJ Abdul Kalam University

2013-2017

- B.Tech(CE)

Projects

Lead NFTtrace-marketplace admin dashboard (Chaincode Consulting LLP)

I led the development of the NFTtrace Marketplace Admin Dashboard, managing a team of 6 members working on both frontend and backend. I initiated and oversaw the project from scratch.

Tech Stack: Nest.js, Next.js, Typescript, MySQL, Bootstrap

Image uploading Feature on GCP Bucket (Chaincode Consulting LLP)

I developed the image uploading feature, writing the API and integrating it into the frontend. This allows users to upload pictures from their gallery or capture images directly from their mobile camera.

Tech Stack: Node.js, React.js, Express.js, MySQL, Bootstrap

Check-In feature implementation in Tejas Project (Chaincode Consulting LLP)

I developed the Check-In feature for the Tejas project for IRCTC, allowing users to check in to the train while traveling using their current GPS location. I wrote the API and implemented the functionality to utilize the current location data. My performance on this project was recognized with a shoutout.

Tech Stack: Node.js, Next.js, Express.js, MySQL, Bootstrap

Mentor HRMS Project (Chaincode Consulting LLP)

I mentored a team of 8 members working on the HRMS project. We built the project from scratch and implemented features such as attendance tracking, leave application, employee onboarding, role-based login, and payslip generation.

Tech Stack: Next.js, MongoDB, Tailwind

Weather-App

I developed a weather app where you can check weather details your current location with GPS and user can search weather details for any Indian city. Used AccuWeather API for fetching weather details.

Tech Stack: React.js, Node.js, Express.js, Tailwind

Freelancing Experience

Callmax.ai

Duration:- 1 Week

Developed APIs for user onboarding, restaurant onboarding, updating details of users and restaurants, deleting details of users and restaurants, creating slots, retrieving slots, updating slots, deleting slots, and retrieving restaurant and slot details.

Tech Stack: Node.js, Express.js, MySQL

GameX

Duration:- 2 Week

I developed the UI for the game order page, implementing features that allow users to view all available games with filters and add games to their cart.

Tech Stack: React.js, Tailwind
